

Madrid June, 2018

Dear Dr.

We are delighted to announce the organization of the seventh Bone and Soft Tissue Tumors Madrid Course in Madrid.

We feel privileged to be holding it again this year, having enlarged, updated and diversified its content to make it even more popular than before.

Orthopaedic oncology surgeons, musculoskeletal pathologists, bone radiologists, medical oncologists, reconstructive and reparative surgeons and medical radiation oncologists from the best Sarcomas Centers from U.S.A.

The faculty come from Harvard Medical School, the Massachusetts General Hospital (Boston), the Beth Israel Deaconess Medical Center (Boston), David Geffen School of Medicine (UCLA), Miller School of Medicine at University of Miami, MD Anderson Cancer Center (Houston), Health Science Center at University of Texas (San Antonio), New Jersey Medical School at University Hospital (Newark) NOVA Southeastern University College of Allopathic Medicine (FL), Ronald Reagan UCLA Medical Center and La Paz University Hospital (Madrid) will be responsible for imparting the course in accordance with the precepts established since the course started by Dr Henry J. Mankin.

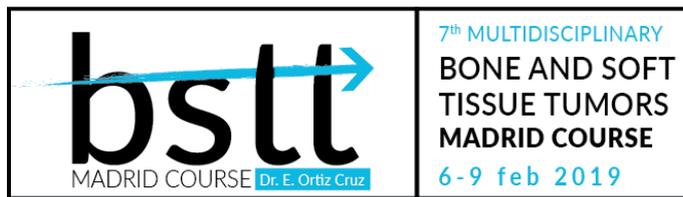

The Course is supported” by Musculoskeletal Tumor Society (www.msts.org) in the faculty are MSTS members including committee members and presidential line.

This course has an international impact in different ways. This course is considered one of the best demonstrated the multidisciplinary treatment of bone and soft tissue sarcoma.

It will be also of great help if you could announce and disseminate the course details to your staff and collaborators through your available channels. You can find all the info about our course in its web: <http://bstt-madridcourse.com/> and social media: https://twitter.com/bstt_course and <https://www.linkedin.com/in/bone-and-soft-tissue-tumors/>

The course offers to all multidisciplinary sarcoma team greater knowledge of the scientific basis of musculoskeletal pathology, in which the roles of the Orthopaedic surgeon, pathologist and radiologist overlap.

The range of different treatment options, both general (medical oncology) and local Orthopaedic oncology surgery, radiation oncology and reconstructive and reparative surgery) complement the BSTT Course.

This course was organized in Madrid in 2000, 2003, 2009, 2012, 2014 and 2016 with excellent attendance figures, since when we have been repeatedly asked when we would be organizing it again.

We expect a multidisciplinary audience and for the previous courses 40% of it is from outside of Spain

In the meantime, I am at your disposal for any enquiries and/or comments you may have.

Yours sincerely,

Eduardo J. Ortiz-Cruz, MD, PhD
