

AUSTRALIAN ASSOCIATION OF MUSCULOSKELETAL MEDICINE

ASSESSMENT AND MANAGEMENT OF LOWER LIMB PAIN

A learning module for doctors wanting to boost their skills and confidence with patients suffering from painful lower limb disorders.

Learn how to:

- Sharpen your diagnostic skills with more focused history taking
- Refine your physical examination skills and make sense of your findings
- Target and interpret lower limb investigations
- Make a specific diagnosis leading to effective treatment. Conditions include osteoarthritis, common ligament and meniscal injuries, tendinopathies, plantar fasciitis, metatarsalgia and many others
- Do lower limb joint/bursa injections in your clinic
- Prescribe appropriate exercises and medications

The module comprises a prereading component of 6 hours with MCQs to check comprehension in preparation for a day-long workshop of interactive tutorials, hands on physical examination and treatment techniques with feedback and case discussions.

WHEN?	Saturday 11 May, 2019 from 8.30 am – 5.00 pm

Accredited with ACRRM for 30 PRPD Points for the 2017-2019 Triennium. (ACRRM ID: 16378)

The lower limb pain module is the final of four modules being offered by the Australian Association of Musculoskeletal Medicine leading to the award of the 'Certificate in Musculoskeletal Medicine'. These modules offered in a repeating annual cycle in Brisbane, cover the assessment and management of pain and disability in the (i) low back, (ii) neck and upper back, (iii) upper limbs and (iv) lower limbs.

The modules can be taken independently and in any order, but all four modules must be successfully completed to be awarded the certificate.
